

POSITIVE
— GROUP —

About Us

Positive Group is a multidisciplinary group of companies with long-standing experience across key industrial sectors, with a strong focus on **mining exploration, drilling, and project development**. We provide integrated solutions spanning mining, drilling, consultancy, foreign trade, logistics, construction, defense, and turnkey project services.

Supported by highly experienced technical teams, Positive Group delivers value-added services from **early-stage mineral exploration to advanced drilling operations and project execution**. Our operational strength, combined with engineering expertise and a commitment to international standards, enables us to act as a reliable partner in complex and challenging mining environments.

Driven by innovation and a client-focused mindset, we consistently aim to deliver efficient, safe, and sustainable solutions. Quality, reliability, and operational integrity are fundamental principles in every service we provide. We thank all our clients and partners who share in our success and trust us as a long-term strategic partner. We will continue to grow and evolve with the same determination and professionalism.

Our Vision

To become a **globally recognized and respected mining and engineering services company**, delivering reliable, high-quality, and sustainable solutions both domestically and internationally. We strive to remain at the forefront of technological advancement while continuously improving our operational excellence.

Our Mission

To operate as a **trusted, technically competent, and reputable organization**, delivering high-quality, client-oriented services across the mining value chain. We aim to create long-term value by respecting stakeholder rights, investing in continuous improvement, and maintaining the highest levels of safety, efficiency, and client satisfaction.

Our Principles

Client-Centric Approach

Client satisfaction defines our success. We apply our technical expertise and industry knowledge to deliver optimized, timely, and cost-effective solutions tailored to each project.

People and Expertise

We believe sustainable success is achieved through skilled professionals working collaboratively. Our corporate culture is built on continuous learning, diversity, transparency, mutual respect, leadership, and accountability.

Our Objectives

- Deliver technically sound, reliable, and high-quality mining services
- Ensure continuity and consistency in engineering and operational solutions
- Achieve zero-accident operations through strict safety standards
- Promote environmentally responsible planning and execution
- Strengthen teamwork and integrated project coordination
- Establish a strong culture of productivity and quality
- Maintain continuous development through innovation and technology

Environmental Policy

At Positive Group, environmental stewardship is an integral part of our mining and drilling operations. In line with sustainable development principles, we commit to:

- Full compliance with national and international environmental regulations
- Preventing environmental pollution through advanced technologies and best practices
- Efficient use and protection of natural resources throughout all project phases
- Monitoring, controlling, and minimizing environmental impacts from project initiation to completion
- Reducing waste generation and maximizing recycling wherever possible
- Enhancing environmental awareness across all organizational levels through continuous training

Occupational Health and Safety Policy

Positive Group firmly believes that operational efficiency can only be achieved in a safe and healthy working environment. Accordingly, we commit to:

- Compliance with all national and international OHS regulations
- Proactive risk identification and mitigation across all drilling and mining activities
- Continuous improvement of OHS performance through technological and procedural advancements
- Proper use and maintenance of all safety equipment
- Comprehensive safety training for all personnel, from management to field operations

Our Services

Mining and Drilling Services

Positive Group conducts safe, efficient, and high-performance drilling operations using advanced technologies and modern equipment. Environmental responsibility and operational safety are embedded in all exploration and drilling activities.

Drilling Services

We provide professional drilling services utilizing state-of-the-art technologies and innovative methodologies to ensure accurate access to subsurface resources. Our experienced technical teams conduct detailed geological analysis and precision drilling to maximize resource potential and data reliability.

1 Surface Core Drilling

2 Underground Core Drilling

3 Reverse Circulation (RC) Drilling

4 Geotechnical Drilling

5 RAB Drilling

6 Horizontal Drilling

7 Geothermal Gradient Exploration Drilling

8 Hydrogeological Drilling

Drilling Equipment Fleet

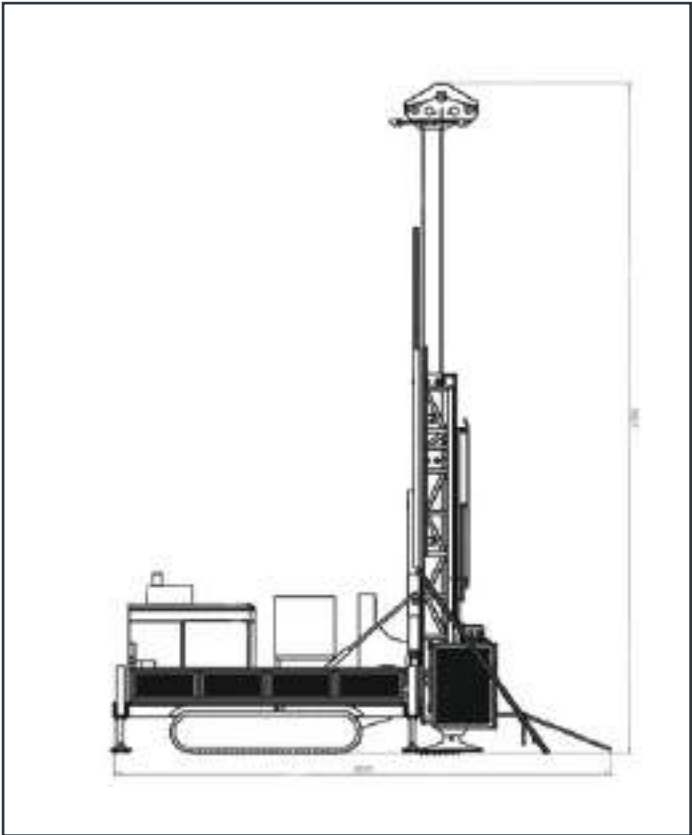

PG 500 – Core Drill Rig

GENERAL SPECIFICATIONS

The PG 500, with its compact design and deep drilling capacity, is capable of completing wireline diamond core drill holes. Its crawler-mounted system enables the rig to operate efficiently across rugged terrain.

TECHNICAL SPECIFICATIONS

Drilling Angle:		45° – 90°	
Drilling Capacity (Wireline Diamond Core Drilling):			
Core Drilling:	PWL 900m	HWL-1500m	
	NWL-2000m	BWL-2500m	

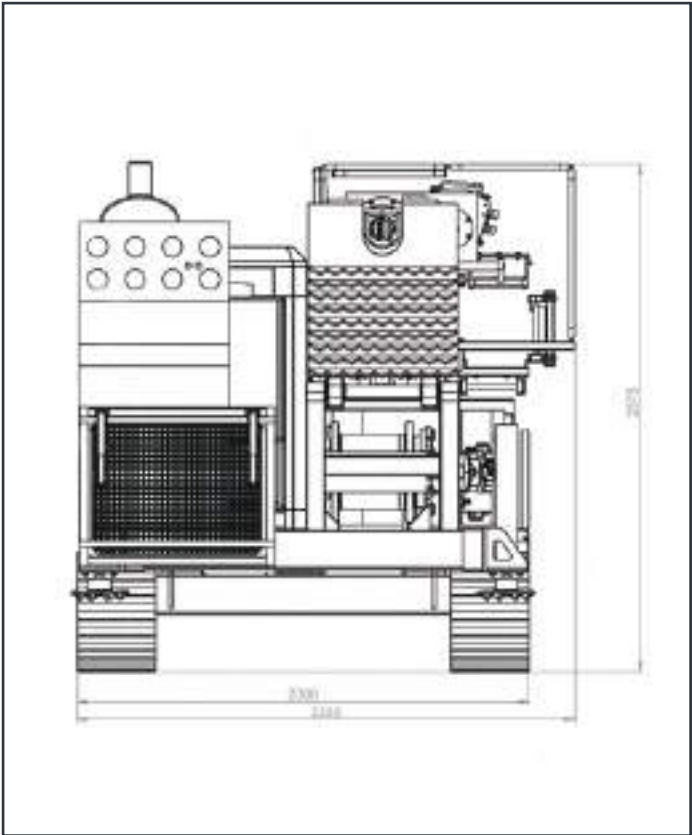

PGMP 450 – Multipurpose Core Drill Rig

Overview

The PGMP 450 is a versatile, high-capacity rig designed for both core drilling and RC drilling operations. Its crawler-mounted configuration ensures high operational efficiency in rugged and remote terrains.

Technical Specifications

Drilling Angle:		45° – 90°	
Drilling Capacity:			
Core Drilling:	PWL 650m	HWL-1000m	
	NWL-1550m	BWL-2050m	
RC Drilling Capacity:			
4": 400 m		4½": 350 m	

PG 1000 – Core Drill Rig

GENERAL SPECIFICATIONS

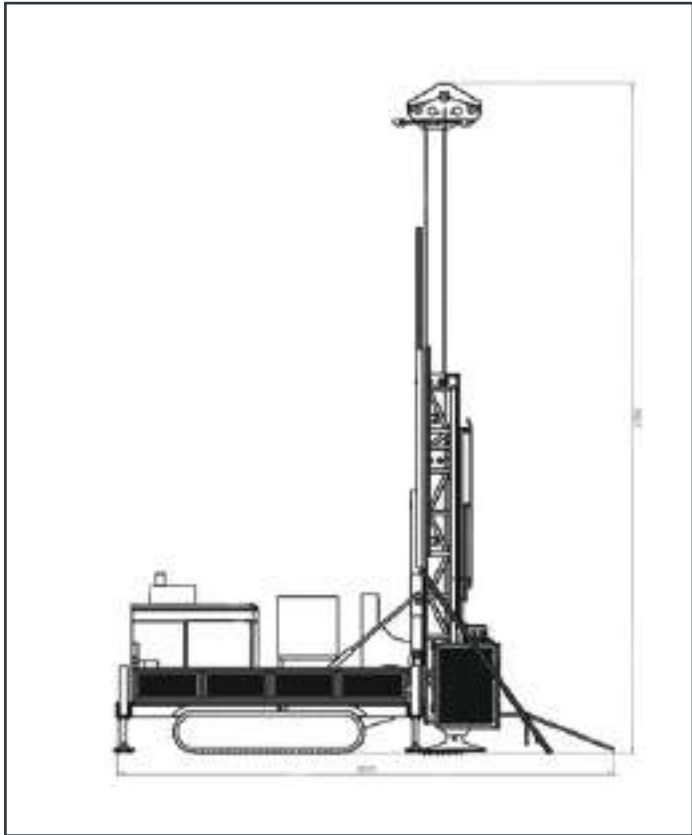

The PG 1000 features a compact design combined with enhanced drilling depth, making it suitable for completing wireline diamond core drill holes. Its crawler system allows smooth operation in challenging terrain conditions.

TECHNICAL SPECIFICATIONS

Drilling Angle: 45° - 90°

Drilling Capacity (Wireline Diamond Core Drilling):

Core Drilling:	PWL 1500m	HWL-2200m
	NWL-2500m	BWL-3000m

GEMEX MP1000

Overview

The GEMEX MP1000 is a heavy-duty drilling rig designed for demanding exploration programs. It offers both core and RC drilling capabilities with high operational reliability and performance.

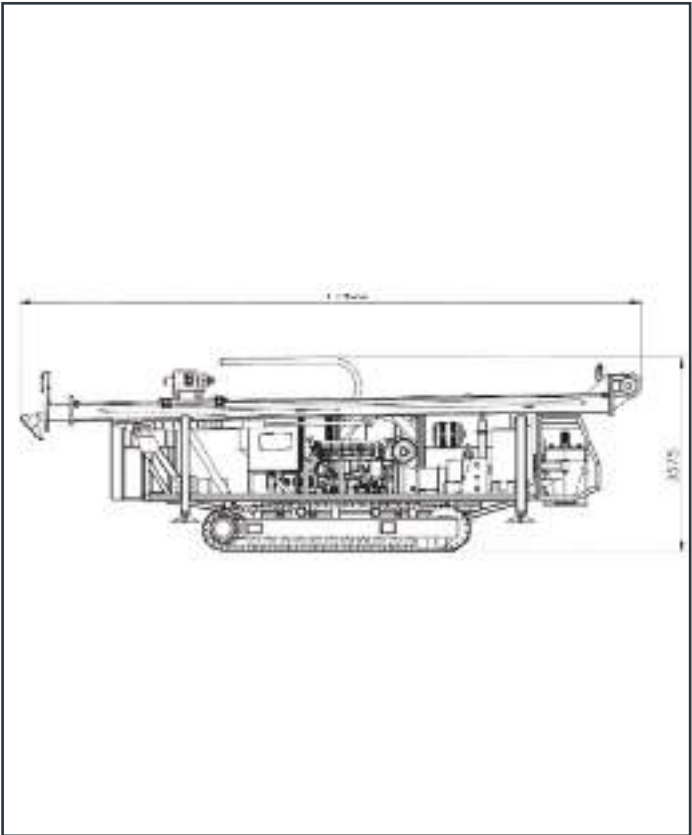

Technical Specifications

Drilling Angle: 45° - 90°

Core Drilling Capacity:

Core Drilling:	PWL 650m	HWL-1000m
	NWL-1550m	BWL-2050m

RC Drilling Capacity: 4": 400 m 4½": 350 m

Consulting Services

Defense Services

In the field of defense industry, we provide **strategic consultancy, business development, and process management services** to public institutions, prime contractors, and subcontractors.

Our company supports its clients throughout **all phases of the project life cycle**, in line with the high standards of **security, regulatory compliance, technical competence, and operational discipline** required by defense projects.

Our objective is to contribute to the establishment of a **sustainable, efficient, and competitive ecosystem** for stakeholders operating in the defense industry, while ensuring that projects are delivered **on time, securely, and with maximum operational efficiency**.

Industrial Products

Our company offers **comprehensive consultancy services** in the field of industrial products, addressing the needs of various sectors. From production to procurement, we provide effective solutions in **product selection, technical compliance, and cost efficiency** at every stage of the process.

In addition, through our **reliable and sustainable business partners**, we supply industrial products and ensure that our clients receive the required products **accurately, completely, and on time**. With our expert-driven approach, we aim to create **added value** for your industrial projects.

Foreign Trade Services

With extensive global experience gained across dozens of countries and deep market knowledge, our company positions itself as a **strategic solution partner** in foreign trade operations.

Our approach, which brings buyers and sellers together on the right platform, is supported by **target market analysis, business partner development, and the structuring of commercial processes**. We develop sustainable and **scalable trade models** that create value in international markets and provide companies with clear strategic roadmaps.

Logistics Services

We approach logistics not merely as an operational necessity, but as a **strategic component of international trade**.

Based on our field experience across multiple countries and sectoral expertise, we provide consultancy services in **designing optimal logistics solutions, coordinating stakeholders, and managing logistics processes effectively**. Through this approach, we aim to deliver **speed, transparency, and efficiency** in our clients' international operations.

Construction Services

In construction projects, we offer a **visionary project management approach** shaped by our international experience.

Leveraging knowledge gained across different geographies, we provide guidance in **project planning, selection of the right business partners, and holistic process management**. Our goal is not only to complete projects, but to deliver them in line with **international standards**, ensuring **long-term and sustainable value creation**.

Project Management and Strategic Investment Partnership

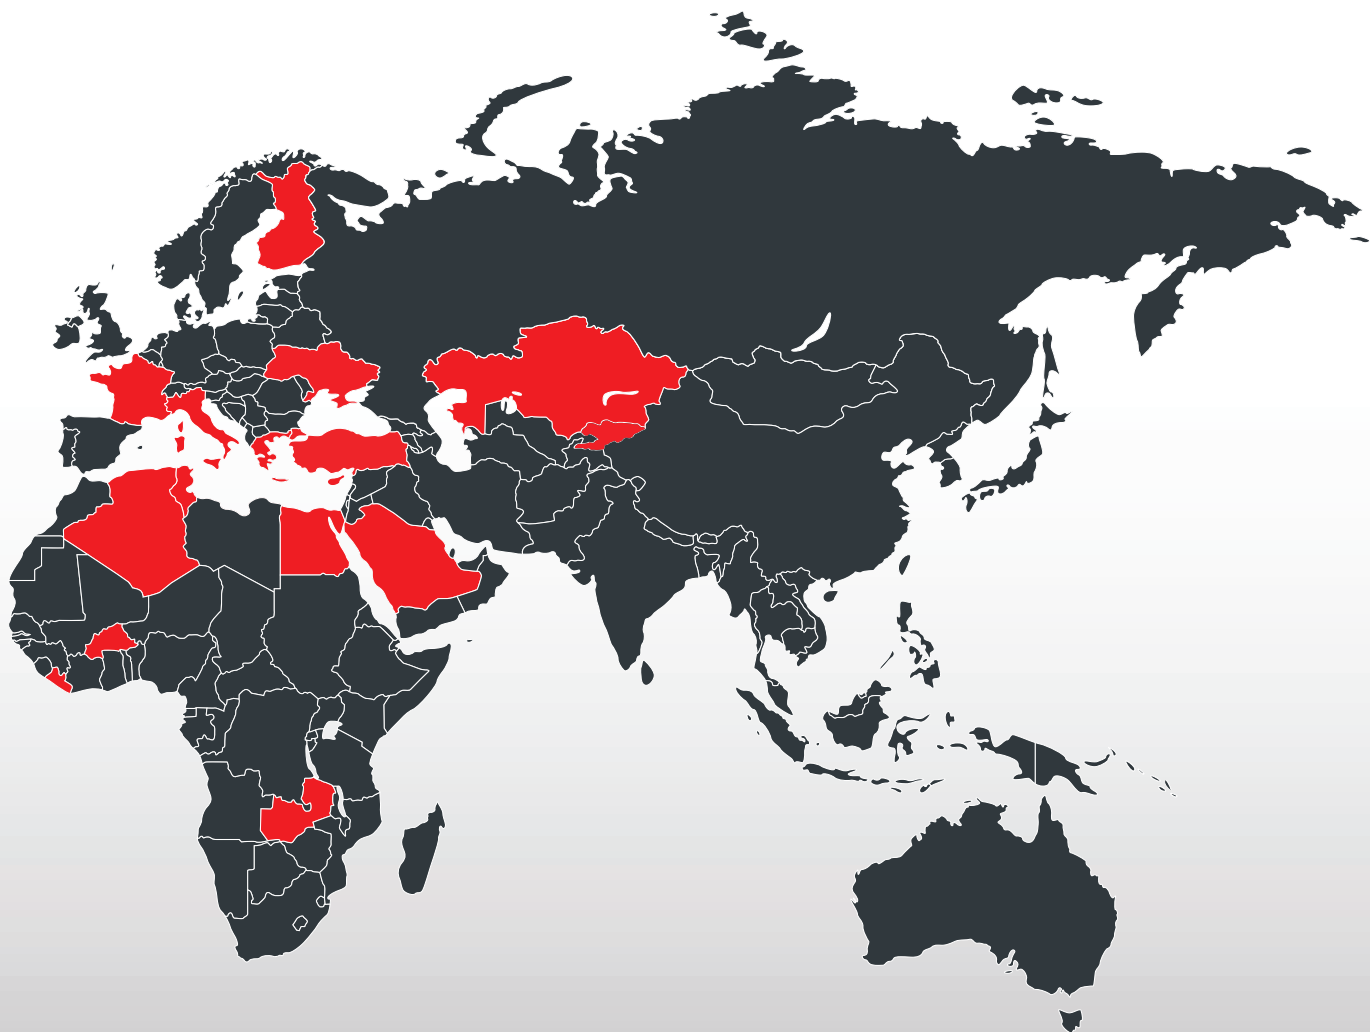

With extensive international experience across dozens of countries and a multidisciplinary knowledge base, our company acts not only as a project manager but as a **strategic partner that designs, structures, and creates value**.

For projects developed across various sectors, we manage the entire process—from concept to execution—through a **holistic approach**, bringing together the right stakeholders and establishing **sustainable strategic roadmaps**.

Our strategic investment partnership model is built on **identifying the right investment opportunities, structuring effective business models, and developing long-term collaborations**. Leveraging our global market experience, we aim to ensure that investments serve not only current objectives but also **future growth potential**.
